

THE NECESSITY OF CICD AS A BUSINESS STRATEGY

By Marietta Ngwe

1. Easy to trace compile and unit test bugs

→
Ease of tracing bugs implies developers can spend more time coding

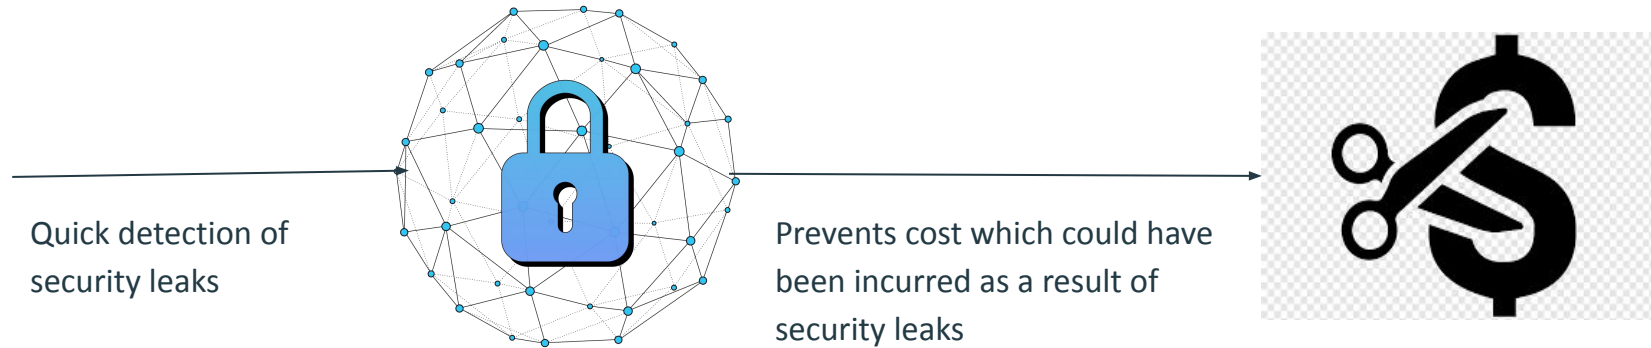

→
This reduces cost, as more time will be spent on product development other than tracing bugs

Cost reduction benefits

2. Easy detection of Security leaks

Avoids cost

3. Automates infrastructure creation

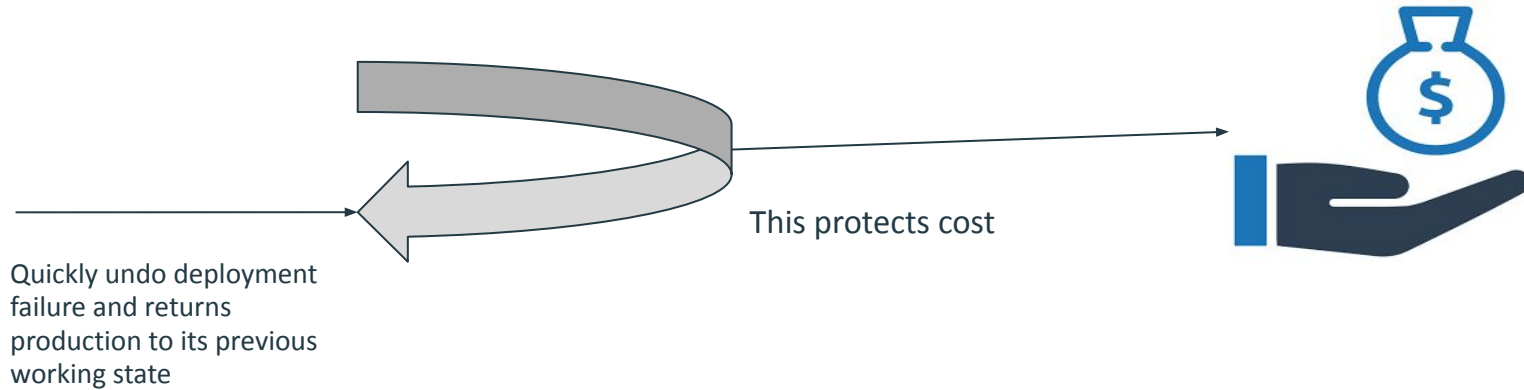

Avoids incurring cost

4. Faster and frequent product deployment

Increases revenue

5. Automated rollback triggered by production failure

Protects cost
